

# VS-3

## single-stage gas-controlled microlog

The product adopts pneumatic push-lean coupling mode, which is mainly used for seismic wave reception in drilling. Single component or three component geophone can be installed inside, which is suitable for drilling with diameters of 100–200 mm.

Main specifications and technical indicators:

Diameter: 67mm

Length: 900mm

Weight: 16Kg

Diameter range: 100–200 mm

Maximum depth : 80 M
