

PS-5GR

High Sensitivity Geophone

PS-5GR is a kind of new geophone developed with small size featuring a high-sensitivity and low natural frequency. Sensitivity is comparable to an array geophones

- low Frequency: 5 Hz
- High sensitivity: 80 V/m/s
- Light in weight and easy to deploy.

Parameter/mode	PS-5GR (22°C)
Natural Frequency (Hz)	$5 \pm 7.5\%$
Coil Resistance (Ω)	$1850 \pm 5\%$
Sensitivity (V/m/s)	$80 \pm 5\%$
Damping	$0.6 \pm 7.5\%$
Spurious Frequency (Hz)	≥ 120
Distortion (%)	≤ 0.2
Max.Motion (mm)	2.54
Moving Mass (g)	17
Dimensions (d × h)mm	30.2×39.9
Temperature Range (°C)	$-40 \sim +80$
Warranty Period(Year)	1.5
Weight (g)	140
